

HOW TO CREATE YOUR OWN SIMPLY ELEGANT HOLIDAY CENTERPIECE

Using AquaGems and BrightSpots

This elegant centerpiece with its simplistic design will add a touch of style to your holiday dinner table.

What you will need:

- CLEAR GLASS, CYLINDER-TYPE VASE.
- INEXPENSIVE PLASTIC FLORAL BOWL FOR BASE. Any kind of flat base will work for this.
- FLORAL FOAM OR FLORAL RING. Select according to the base you choose.
- FRESH OR SILK RED ROSES AND/OR CARNATIONS. (These are readily available.) You can use any kind of red flower here.
- AQUAGEMS. The amount you need depends on the size of the vase you choose. A 10-gram package of dry (or one bottle of hydrated) AquaGems may be enough; for a larger vase, you may need a 40-gram package of dry (or several bottles of hydrated) AquaGems. Suggested colors are Emerald (green), Ruby (red), or Diamond (clear). In the arrangement pictured here, our color was Diamond (clear).
- BRIGHTSPOTS. Use as many of these submersible accent lights as you like to create highlights.

Where to get these materials:

- Vases, plastic floral bowls, foam or rings, and flowers are available at your local craft store or florist or through online vendors. Don't hesitate to use materials that you already have at home.
- AquaGems and BrightSpots are manufactured by AquaGems of Idaho, LLC.

How to prepare:

1. If you have bought the dry form of AquaGems, you will need to place them in a water-filled container and allow 4 to 6 hours for the Gems to hydrate (see instructions on the packaging). If you have bought the bottled form, your Gems are fully hydrated and ready for use immediately.
2. Place vase inside your floral foam ring or arrange your floral foam in your base around your vase. The vase needs to be set first so it remains stable; use floral tape if necessary. If using silk, use Sahara foam; if using fresh, use Oasis foam.
3. Fill vase to the top with hydrated AquaGems.
4. Turn on the BrightSpots. Place them into the AquaGems, using a stick or ruler to guide them into position.
5. Arrange your flowers all the way around the base of the vase, use filler greens as needed. Make sure to cover up all mechanics so they are not seen. Done!
