

# HOW TO CREATE YOUR OWN PUMPKIN JAR WITH LID ARRANGEMENT

Using AquaGems and BrightSpots

*This is a very easy project that anyone can do, even the kids! Use the arrangement alone on your holiday table or put it next to our other pumpkin arrangement.*

## What you will need:

- CLEAR GLASS PUMPKIN JAR WITH LID.
- AQUAGEMS. Depending on the size of your jar, you will probably need one 40-gram package of dry (or several bottles of hydrated) AquaGems of the color Sunstone (orange). Also, one 10-gram package of dry (or one bottle of hydrated) AquaGems of the color Onyx (black).
- BRIGHTSPOTS. Use several of these submersible accent lights to create highlights.

## Where to get these materials:

- Pumpkin jars are available seasonally at your local craft store or florist or through online vendors.
- AquaGems and BrightSpots are manufactured by AquaGems of Idaho, LLC.

## How to prepare:

1. If you have bought the dry form of AquaGems, you will need to place them in a water-filled container and allow 4 to 6 hours for the Gems to hydrate (see instructions on the packaging). If you have bought the bottled form, your Gems are fully hydrated and ready for use immediately.
2. Fill your jar almost to the top with the orange AquaGems. Add a handful or more of black AquaGems into the orange, arranging them as you like to get the desired effect.
3. Turn on your BrightSpots and push them into the AquaGems. Put on the lid and you are done!
